

# Red GUI Architecture

[Overview] | [images/view-overview.png](#)

## VID

VID Visual

Interface

Dialect is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language. VID is a visual programming language for Red, which is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

## View

GUI is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

- `view` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
- `draw` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
- `draw` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
- `draw` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

## React

React is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

## Draw

Draw is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

- VID is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
- `draw` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
- `draw` is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

## OS

API is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

API

VID Draw is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.

Sassenrath is a visual programming language for Red. It is a dialect of the Red programming language, which is a dialect of the Lisp programming language.
